

STUDENT DROPOUT RISK ASSESSMENT REPORT

Generated on January 30, 2026 at 10:50 PM

■■ **CONFIDENTIAL:** This report contains sensitive student information and should be handled according to institutional privacy policies.

EXECUTIVE SUMMARY

Rahul Sharma, a 2nd-year B.Tech Computer Science student, is at a **HIGH** risk (82%) of dropping out, primarily driven by a significant academic decline, low attendance, and severe financial stress. His current CGPA has plummeted from 6.2 to 4.8, fees are two months delayed, and engagement with academic resources and the LMS is minimal, compounded by reported stress requiring counselor visits.

Key Concern: The critical combination of a sharp academic decline (4.8 CGPA) with significant financial stress (delayed fees) and underlying mental health concerns (stress, counselor visits) presents an immediate and severe risk.

Immediate Action Required: Conduct an urgent welfare check and direct outreach to Rahul Sharma within 48 hours to assess his immediate needs and offer initial support.

STUDENT INFORMATION

Name	Rahul Sharma
Roll Number	2023CS101
Course	B.Tech Computer Science
Year	2nd Year
Family Income	■■3,00,000/year
Parent Education	High School
Accommodation	Day Scholar

ACADEMIC PERFORMANCE

Current CGPA	4.8
Previous CGPA	6.2
Attendance	58%
Assignments Submitted	4 out of 10

ENGAGEMENT METRICS

Library Visits	0 visits in 2 months
Last LMS Login	15 days ago
Extracurricular Activities	No participation
Counselor Visits	Visited 2 times for stress
Fee Status	2 months delayed

RISK ASSESSMENT

HIGH RISK - 82%

Risk Factor Breakdown:

Academic Decline - 35%
Significant drop in CGPA from 6.2 to 4.8

Low Attendance - 25%
Attendance at 58%, below minimum requirement

Financial Stress - 20%
Fee payment delayed by 2 months

Mental Health Concern - 15%
Multiple counselor visits for stress

Low Engagement - 5%
No library visits, no extracurricular participation

■ ROOT CAUSE ANALYSIS

Primary Causes:

- Significant financial burden causing delayed fees and psychological stress.
- Underlying mental health concerns (stress) impacting focus, motivation, and engagement.
- Academic struggles and difficulty coping with course material, leading to declining performance and disengagement.
- Lack of engagement with academic resources (LMS, library) and overall campus life.

Interconnections:

Financial stress likely exacerbates Rahul's mental health, leading to decreased motivation, low attendance, and academic underperformance. The academic decline itself can further increase stress and disengagement, creating a negative feedback loop. His minimal engagement with library and LMS indicates a broader withdrawal from academic activities, likely a symptom of these interconnected issues.

Unique Concerns:

The drastic drop in CGPA from 6.2 to 4.8 suggests a sudden and severe crisis rather than a gradual decline, indicating acute challenges. His two counselor visits for stress also highlight a recognized need for mental health support, which is often a precursor to academic and financial difficulties.

■ DETAILED INTERVENTION PLAN

■ Immediate Actions (Within 48 Hours)

Initiate direct contact (phone/email) with Rahul Sharma to conduct a welfare check and understand immediate needs.

Responsible: Academic Advisor / Student Welfare Officer

Expected Outcome: Establish initial contact, assess immediate safety/well-being, and demonstrate institutional support.

■ Short-Term Actions (Within 2 Weeks)

Arrange a confidential meeting with a financial aid counselor to explore options for fee payment plans, scholarships, or emergency funds.

Responsible: Financial Aid Office / Student Welfare Officer

Expected Outcome: Alleviate immediate financial burden and reduce associated stress.

Schedule a follow-up counseling session with the Mental Health Counseling Center to address stress and coping mechanisms.

Responsible: Counseling Center

Expected Outcome: Provide ongoing mental health support and develop strategies for stress management.

■ Medium-Term Actions (Within 1 Month)

Connect Rahul with an academic mentor or peer tutor for specific challenging subjects to improve understanding and performance.

Responsible: Department Head / Academic Advisor

Expected Outcome: Improve academic performance, re-engage with coursework, and increase confidence.

Monitor attendance records and LMS activity, providing proactive, non-punitive reminders and support.

Responsible: Academic Advisor / Course Instructors

Expected Outcome: Increase consistent engagement with academic activities and course material.

■ Long-Term Strategies (Ongoing)

Develop a personalized academic success plan, including goal setting, time management strategies, and regular check-ins.

Responsible: Academic Advisor

Expected Outcome: Foster long-term academic stability, improve study habits, and ensure sustained progress.

Encourage participation in relevant student clubs, departmental activities, or campus events to enhance social integration and belonging.

Responsible: Student Affairs Office

Expected Outcome: Improve overall well-being, sense of community, and reduce feelings of isolation.

■ RESOURCE REQUIREMENTS

Personnel Needed:

- Academic Advisor
- Student Welfare Officer
- Financial Aid Counselor
- Mental Health Counselor
- Department Head
- Peer Tutor/Academic Mentor

Time Investment: Estimated 5-7 hours per week (initial intensive, then moderate for monitoring and support).

Financial Support: Potential for tuition fee assistance/waiver; minor funding for student engagement activities if applicable.

Academic Resources:

- Tutoring services (peer or faculty)
- Academic workshops (study skills, time management)

- Access to updated course materials and online learning platforms
- Designated quiet study spaces

■ SUCCESS METRICS & MONITORING

Key Performance Indicators (KPIs):

- Increase in attendance to greater than 75% across all courses.
- Improvement in current CGPA to greater than 5.5 by the end of the semester.
- Consistent LMS logins (at least 3-4 times per week) and active participation.
- Resolution or clear plan for delayed fee payment status.
- Reduced self-reported stress levels and continued engagement with counseling services.

Milestone Checkpoints:

- Initial contact established and immediate needs assessed (within 48 hours).
- Financial aid plan or solution initiated (within 2 weeks).
- Participation in at least two academic support or counseling sessions (within 1 month).
- Mid-semester exam results show an upward trend in academic performance (within 2 months).

Warning Signs to Watch:

- Continued non-responsiveness to outreach attempts or missed appointments.
- Further decline in attendance or academic performance.
- Withdrawal from academic or social activities, increased isolation.
- Verbalization of hopelessness or increased stress during counseling sessions.

Re-evaluation Timeline: Monthly for the first three months, then quarterly until risk level is mitigated to LOW.

■ PREDICTED OUTCOME

Without Intervention:	Without immediate and comprehensive intervention, Rahul's academic performance will almost certainly continue to deteriorate, leading to academic probation or suspension. The unresolved financial and mental health issues will likely overwhelm him, resulting in a very high probability of dropping out of the program.
With Intervention:	With timely and sustained intervention, Rahul is highly likely to stabilize his academic performance, effectively manage his financial situation, improve his mental well-being, and successfully re-engage with his studies, ultimately completing his B.Tech Computer Science course.
Success Probability:	70%

■ APPENDIX

Risk Calculation Methodology:

This assessment uses a machine learning model trained on historical student data. The model analyzes multiple factors including academic performance, attendance, engagement metrics, and socio-economic indicators to predict dropout risk.

Glossary of Terms:

- **Risk Level:** Overall categorization (HIGH/MEDIUM/LOW) based on dropout probability
- **Risk Percentage:** Numerical probability (0-100%) of student dropout
- **Risk Factors:** Specific areas contributing to overall risk assessment
- **Intervention:** Targeted action to address identified risk factors
- **KPI:** Key Performance Indicator - measurable metric for tracking progress

This report was generated using AI-powered analysis and should be used as a guide for intervention planning.
